

CERIUM METAL - Ce

Properties

Cerium metal is a grey, ductile rare earth metal. It is one of the extremely reactive rare earth metals and is oxidizing very fast in contact with air and water.

Application

- Casting alloys
- FeSiMg

Chemical analysis

Total Rare Earth Metals (TREM)	min. 98,0 %
100 % TREM contains	
Ce	min. 98,0 %

Physical parameter

Density	6,7 g/cm ³
Melting point	795°C

Standard form/size

- Irregular pieces
- Rods
 Diameter 12,7 mm, length min. 10 mm (approx. 5-10 g) -
 max. 120 mm (approx. 90-100 g)

- **Special qualities and forms on request.**

Packing

- Drums
- Other packing on request
