

## NEODYMIUM METAL - Nd

### Properties

Neodymium metal is a silver-white, ductile rare earth metal. In contact with air it is oxidizing on the surface.

### Application

- Magnesium alloys
- Magnets

### Chemical analysis

Total Rare Earth Metals (TREM)	min. 98,0 %
100 % TREM contains	
Nd	min. 98,0 %

### Physical parameters

Density	6,8 g/cm <sup>3</sup>
Melting point	1.024°C

### Standard form/Size

- Irregular pieces
- Rods  
Diameter 12,7 mm, length min. 10 mm (approx. 7-10 g) - max. 120 mm (approx. 60 – 70 g)
- Powder

- **Special qualities and forms on request.**

### Packing

- Drums
- Other packing on request
